

Light Columns

by John-Roger

Years ago, you were taught about placing columns of Light throughout the land. Some of you do that regularly. Some of you do it less regularly.

Spirit and the Traveler are asking again that you activate that ability and become more aware of anchoring the Light, specifically and consciously, wherever you are.

If you are sitting by a pool or in a hotel room, if you are waiting in line at a bank or riding a bus, if you are driving on the freeway or visiting a city far from your home — wherever you happen to find yourself, ask God to bless the land and anchor spiritual Light into it.

As you place the Light column, envision a funnel or pillar of Light from the highest place you can imagine going right through you and into the center of the earth, into the very core of the earth, and then release the vision. Your Light column may be effective for two days, 30 minutes, or 15 years. Its duration doesn't matter. The Light column may hold for two hours, which may be just the time it was needed in that area. If you are in one area day after day, continue to place Light columns there. People who have used this technique in their homes or in their offices have noticed positive results. It's a beautiful and effective way to clean up your immediate environment.

Many years ago when I was in Mexico, I climbed to the top of the Pyramid of the Sun and placed a Light column there. I returned a few years later and could see the Light column from miles away. I could see it as a big, shimmering white-purple haze in the air above the pyramid. It had held solidly. That was so nice because a lot of people got to walk into the spiritual Light frequency as they climbed to the top of the pyramid.

Have you ever seen the sun shining through a window and seen dust particles floating in the air? A Light column will sometimes look very much like that. When you see that kind of Light energy or force, you sometimes think your vision is a little disturbed. It may be, however, that you are tuning in to higher frequencies and seeing a little more than the physical realm. That's good news. Of course, you might not visually perceive the Light columns; you certainly don't have to. Not seeing them doesn't lessen in any way your ability to create them. You will probably never know directly the benefit that such work has. You will not know the ways it touches to people or the positive changes it brings about. It is a silent work, a silent ministry, and a powerful one.
